The original dashboard.

Carefully unclip the original panel with plastic panel removal tools. Remove the OEM head unit by inserting four release keys. Keep the white panel clips holding the fascia in place for use later in step 6.

Take the left and right brackets and place them as shown in the picture.

Attach the remaining two brackets to the Pioneer head unit using the screws supplied.

Connect all cables to the Pioneer head unit. Insert the head unit into the dash and check correct operation of the head unit. Secure the head unit into place in the circled positions, using the four small screws supplied.

Take the supplied fascia plate and attach the white panel clips removed in step 2. Mount the fascia over the Pioneer head unit. Installation is now complete.
